## **3- frame and objectives Training:**

- **A- Admission requirements (specifying the typical baccalaureate specializations that allow admission to the relevant master's program)**
- ☐ The baccalaureate must be in private law.
- ☐ The candidate must hold a Bachelor's degree in Law, LMD system.
- ☐ The candidate must hold a traditional bachelor's degree in law.
- ☐ Enrollment in the program is based on the conditions and standards established by the College's Planning and Orientation Committee.
- **B- Training objectives (skills targeted, knowledge acquired at the end of the training, 20 lines maximum)**
- ☐ Inform students about the nature of the specialization (contracts and liability) and its most important topics.
- ☐ Deepening of basic knowledge of the specialization course (contracts and responsibility).
- ☐ Allow the student to acquire the tools and skills of scientific research and communication with the environment.
- ☐ To provide the student with the opportunity to learn in the field of specialization in the Arabic language, in addition to developing his cognitive abilities in a foreign language and training him in the field of IT, thus encouraging him to open up to the demands of the time.

## **C- .Qualifications and skills targeted (in terms of professional integration – 20 lines maximum)**

- ☐ Ability to process legal texts, particularly in the context of specialization.
- ☐ The ability to read and analyze legal thought and judicial jurisprudence.
- ☐ Ability to deal with legal institutions.

Master scientific research tools and techniques and identify sources of information.

- **D- Regional and national capacities to employ university graduates**

- The court
- ☐ The judiciary
- ☐ Law
- ☐ Documentation

**E- Gateways to other specializations:**

The Master's degree in Contracts aims to bridge the gap between the specialization in positive law and the specialization in Islamic Sharia law, as well as international law, which recently focuses on international treaties and global organizations. It also establishes another bridge between real estate law and real estate law in matters of real estate inheritance.

and indicators follow up Training :

**F - Training monitoring indicators:**

Once this training has been approved, the college, through the person responsible for it, will submit it to the selection of undergraduate students and will include it with the other specializations offered for training at the master's level at the college, taking into account the following:

### **the first half**

Unit Name: Basic Education Unit

Subject Name: Civil Contracts

Balance: 3

Factor: 6

□ Educational objectives:

Civil contracts are contracts that are handled by a notary or a judge. Since this course is aimed at them, it is essential that the student be familiar with this subject. Prior knowledge required:

Civil law.

☐ Material content:

Sales contract

Mortgage contract

Rental contract

Loan agreement

Agency contract

☐ Personal work:

☐ Unnamed contracts

- Hotel accommodation contract

- Publishing contract

Assessment method: continuous assessment, exam, etc. (weighting is left to the discretion of the training team)

References: (books, publications, websites, etc.) This is on the one hand, and on the other hand, it can be a party to a contract. The course in general also allows the student to know his rights and those of others.

- **Jaafar, Muhammad Saeed, The Authorization of Contract in Civil Law and Islamic Jurisprudence, Algeria: Dar Houma. 2003**
- **Mohammed, Mahmoud Abdel Rahman, Exploitation and Fraud in Contracts and Their Role in Balancing Contractual Performance: A Comparative Study in Law, Cairo: Dar Al Nahda Al Arabiya, 1995**

The first semester:

**Unit Name: Program Learning Units**

**Course Name: Scientific Research Methodology 1**

**Balance: 6**

**Factor: 3**

Educational objectives:

This course aims to enable the student to master the methods of scientific research in the field of legal sciences and the methods of commenting on legal texts and commenting on judicial decisions.

Prerequisite knowledge:

Legal notices - Automated reporting.

- **Article content:**
- ☐ **The nature of scientific research in the field of legal sciences:**

- Definition of scientific research
- Types of scientific research.
- □ Research methods in legal sciences:
- The deductive approach and how to apply it in legal sciences.
- -The stages of the historical method and how to apply it to legal sciences.
- The comparative approach, its stages and how to apply it in legal sciences.
- The descriptive approach, its stages and how to apply it in legal sciences.
- The analytical approach, its stages, characteristics and application in the field of legal sciences.
- The concept of the experimental method and its areas of application in legal sciences.
- □ Procedures for commenting on judicial decisions (preparatory phase - written phase).
- □ Methods of commenting on legal texts.
- Stages of commenting on a legal text (form and content of the text – linguistic structure).
- - Gather texts that have a common denominator.
- - Research into the purpose of the legal text.
- - Final commentary on the legal text.
- □ Personal work: The student works with the professor to choose a method from among the methods and attempts to apply it to a legal research project, in particular by training the student to comment on a legal text.

**Master's degree title:Right private apdeep**

semester: First

**Unit Name: Program Learning Units**

## **Course Name: Professional and Personal Project**

**Balance: 3**

**Factor: 1**

### **What is a professional project?**

A career plan is the path we take to get to where we want to be.

The concept of the project in general is embodied in the following:

- The objective: the job you want to do.

Strategy: This involves developing an action plan to achieve the goal.

- Resources: the funds and means needed to achieve the objective.

- Qualifications and knowledge: sum of personal qualities, knowledge, technical and behavioral qualifications, knowledge network, etc.

Agenda: It is the organization of activities according to a specific time and also the possible stages.

### **2- What is the goal of the professional project?**

The goal of a professional and personal project is to obtain the desired profession that meets the ambitions and inclinations of its owner.

Anyone who practices the profession he desires and which meets his desires and ambitions, puts him in a state of harmony with himself, his work, his family and his community, and he is thus a positive and effective element at all levels.

### **2- What is the goal of the professional project?**

The goal of a professional and personal project is to obtain the desired profession that meets the ambitions and inclinations of its owner.

Anyone who practices the profession they desire and which fulfills their desires and ambitions, places them in a state of harmony with themselves, their work, their family and their community, and thus becomes a positive and effective element at all levels.

### **3- Axes of the professional project:**

1. **Axis 1 - Self-knowledge**
2. **Axis II - Knowledge of the profession**
3. **Axis 3 - Analysis of possible paths**
4. **Axis IV - Selection of the training and the composing institution**
5. **Axis V - Financing**

### **Master:Advanced private law**

semester: Third

name Unit: Education methodology

name Material: Techniques **Media And Contact** (TIC

Balance: 6

Factors: 3

#### **-Educational objectives:**

Information and communication technologies (ICTs) play an important role in promoting human, economic, social, and cultural development due to their distinctive characteristics and greater efficiency than traditional means of communication. ICTs, being widely used, transcend the geographical and political boundaries of countries to reach any point in the world that old means of communication could not. It is also characterized by the abundance and diversity of information and educational and cultural programs aimed at all segments of humanity, available anywhere, anytime, and at low cost. It is an important source of information for individuals, institutions of all kinds, and governments. It also plays an important role in the development of the human element through the programs it offers, such as training programs, educational programs, and others.

Therefore, it is necessary to pay attention to this technology and develop it to use it effectively, while training and teaching students to use it, and making them aware of its importance in development and progress.

#### **Scale program:**

The first axis / the nature of information and communication technologies.

The second axis / sections and types of information and communication technologies.

The third axis / the impact of information and communication technologies on development.

- Prior knowledge:

Automated media.

**Evaluation method:**

Continuous exam + final exam.
