

Definition of the composition: Interpretation and Quranic Sciences

The College of Fundamentals of Religion offers a scientific training in the specialization of Tafsir and Quranic Sciences at the master's level. This specialization is concerned with preparing scientifically competent specialists and specialists in the Holy Quran, its sciences and interpretation in accordance with distinguished scientific standards. This is within the framework of the general understanding and awareness of the importance of the Book of God, which is the first source and reference in every matter to keep the nation preserving its entity and realizing its responsibilities. Since the Word of God is the most honorable information, the knowledge of its interpretation, the reasons for its downloading, its meanings, and its interpretation is the most honorable science. The Tafsir and Qur'anic Sciences Specialist

Training goals

The training in this specialization aims to:

- 1 - Training a specialist in Tafsir and Qur'anic Sciences who is concerned with the study of Tafsir and Qur'anic Sciences.
- 2 - Filling the shortage of this type of training in Algerian universities.
- 3 - Providing a strong training in line with the requirements of the Algerian university and the scientific and cultural research environment of the Algerian society.
- 4 - Meeting the need of the Algerian society in this type of integrated training in sectors with a religious aspect.
- 5 - Meeting the desire of many students to specialize in exegesis and Qur'anic sciences and to deepen their studies and knowledge.
