

Bachelor's Degree in Islamic Economics

✓ Program Overview

- **Do you aspire to become an expert in Islamic economics?**

Islamic economics is a comprehensive academic field that combines deep theoretical foundations with modern financial practices, based on the principles of Islamic Sharia. This specialization aims to qualify students to understand and analyze Islamic economic systems by focusing on Islamic finance, Islamic banking, Sukuk, and risk management. It also provides them with the necessary tools to analyze and evaluate Islamic economic systems in light of contemporary economic challenges.

In line with recent economic and financial developments, the academic program has undergone significant updates by integrating advanced subjects such as econometrics, financial engineering, and economic data analysis. This allows students to acquire advanced analytical skills and connect Islamic economic principles with modern applications in financial markets and finance.

Accordingly, the program aims to prepare graduates capable of designing and evaluating Islamic financial products, contributing to the development of Islamic financial markets, and promoting sustainable economic policies from an Islamic perspective.

- **Program Information Institution:**
