Ministry of Higher Education and Scientific Research
Hassiba Benbouali University – Chlef

**Academic offer of State Engineers Degree
In
agro-technology and innovation**

Etablissement	Faculté / Institut	Département
Hassiba Benbouali University	Natural and Life Sciences	Agronomic Sciences

Field	Subject	Specialty
Natural and life sciences	Agronomic Sciences	agro-technology and innovation

In English Agricultural Engineers ‘Agro-technology and Innovation’ (3rd year)

1. Overview of the programme

The Ingénieurs en Agro-Technologie et Innovation programme at the University of Chlef (Algeria) aims to train engineers specialising in innovative technologies applied to agriculture. Here is an overview of the main elements of the programme:

Programme objectives

- Train engineers capable of modernising the agricultural sector using new technologies.
- Integrate technological innovations (precision agriculture, IoT, biotechnologies, etc.).
- Develop skills in the sustainable management of agricultural resources.

Career opportunities

- Agro-technology engineer
- Precision agriculture consultant
- Agricultural innovation project manager
- Agri-business entrepreneur

2. Strengths of the programme

The agricultural engineering course specialising in Agro-Technology and Innovation offers many advantages, both academically and professionally. Its main strengths are as follows:

1. Multidisciplinary approach

- Combining skills in agronomy, biotechnology, process engineering, data science and innovation management.
- Training at the interface between agriculture, technology and sustainability.

2. Innovation and R&D orientation

- Development of new agricultural technologies (precision farming, bioprocesses, IoT, robotics).
- Management of innovative projects to meet agri-food and environmental challenges.

3. Focus on current issues

- Sustainable agriculture: reducing inputs, optimising resources, agro-ecology.
- Food safety: improving production and processing chains.
- Digital transition: use of AI, drones and intelligent sensors.

4. High employability

- Growth sectors: agri-food, biotechnologies, innovation consultancy, agtech start-ups, agricultural cooperatives.
- A wide range of occupations: R&D engineer, innovation project manager, agro-technology consultant, quality manager..

5. Practical and professional experience

- Work placements in companies or laboratories
- Collaborative projects with manufacturers and research centres.
- Use of high-tech tools (connected farms, experimental platforms).

3. Admissions information

A bachelor's degree in experimental sciences

The course generally lasts 5 years following the classic system (Engineering Cycle).

4. Basic courses :

Core curriculum (1st and 2nd year)

- Applied Mathematics
- Physics and Chemistry
- Plant and animal biology and physiology
- Plant and animal biosystematics
- Applied agriculture and climatology
- Computer science applied to agriculture
- Cartography
- Microbiology, biochemistry, genetics
- Biophysics
- Bioinformatics

5. Advanced subjects :

Specialisation

- Agro-technologies:
 - Agri-food industry technology
 - Machinery and agricultural equipment
 - Animal and plant production and improvement
 - Digital technologies applied to agriculture
 - Applied biotechnologies
- Innovation and Management:
 - Management of innovative agricultural projects
 - Innovative production systems
- Modelling and prototyping
- Work placements on farms and in agro-industrial companies.
- Innovative projects: Design of technological solutions for agriculture (automated greenhouses, agricultural monitoring applications, etc.).

Tuition fees: No tuition fees

Language of instruction: English / Arabic / French

**Common Core curriculum for obtaining the State Engineering Diploma
in the field of "Natural and Life Sciences", Subject "Agronomic Sciences"**

Semester 1

Teaching Unit	Subject headings	HV Weekly			VHS (15 semaines)	Student Individual Work	Coeff	Crédit	Evaluation	
		Course	Directed Work	Practical Work					Exam	Continuous
Fundamental EU Code : UEF1.1 Crédits : 14 Coeff : 7	Animal Biology 1 (Cytology and Histology)	1h30		1h30	45h00	55h00	2	4	60%	40%
